

The United States Army Ordnance Center & School Presents:

Basic Supply Requisitions & Hand Receipts for the Layman

Written By
CW3 James Rinehart

Index By Slide Number

Characteristics of class 2,4,7,9.....	5
Characteristics of Fedlog.....	6
Characteristics of class 9 supply.....	48
Characteristics of class 2, 4, 7 supply.....	121
Ordering Your Parts and Supplies.....	159
Track Your Supply Requisitions.....	219
Maintain a Hand Receipt.....	266

TERMINAL LEARNING OBJECTIVE

Task: Describe the characteristics of class 2,4,7,& 9 supplies.

Condition: In a classroom environment.

Standard: IAW applicable references.

ENABLING LEARNING OBJECTIVE A

Task: Describe characteristics of federal logistics data using FEDLOG.

Condition: In a classroom environment.

Standard: IAW applicable references.

ALL PARTS HAVE A NATIONAL STOCK NUMBER (NSN).

- **2920-00-909-2483 is a typical NSN.**

ALL PARTS HAVE A NATIONAL STOCK NUMBER (NSN).

- 2920-00-909-2483 is a typical NSN.
- 2920 is the Federal Supply Category (FSC).

ALL PARTS HAVE A NATIONAL STOCK NUMBER (NSN).

- 2920-00-909-2483 is a typical NSN.
- 2920 is the Federal Supply Category (FSC).
- 00-909-2483 is the National Item Identification Number (NIIN).

THE NIIN IS IMPORTANT

- Technical manuals, parts manuals, & supply catalogs list their parts in NIIN sequence.

THE NIIN IS IMPORTANT

- Technical manuals, parts manuals, & supply catalogs list their parts in NIIN sequence.
- They do not list parts by NSN sequence.

THE NIIN IS IMPORTANT

- Technical manuals, parts manuals, & supply catalogs list their parts in NIIN sequence.
- They do not list parts by NSN sequence.
- This is why most mechanics will ask you for a NIIN instead of the whole NSN.

ALL PARTS HAVE A PART NUMBER.

- **19207-10929868 is a typical part-number.**

ALL PARTS HAVE A PART NUMBER.

- 19207-10929868 is a typical part-number.
- 19207 is the CAGE code (who makes it).

ALL PARTS HAVE A PART NUMBER.

- 19207-10929868 is a typical part-number.
- 19207 is the CAGE code (who makes it).
- 10929868 is the actual part number.

ALL PARTS HAVE A PART NUMBER.

- 19207-10929868 is a typical part-number.
- 19207 is the CAGE code (who makes it).
- 10929868 is the actual part number.
- Use the actual part number, not the CAGE, when using or researching a NSN/NIIN.

FEDLOG

- **Federal Logistics Data on CD-ROM.**

FEDLOG

- Federal Logistics Data on CD-ROM.
- Usually a 4 disk set.

FEDLOG

- Federal Logistics Data on CD-ROM.
- Usually a 4 disk set.
- Can also be set up on a local area network (LAN).

FEDLOG

- Gives you the logistics, ordering, disposal, & characteristics of a part.

FEDLOG

- Gives you the logistics, ordering, disposal, & characteristics of a part.
- Gives you the ability to cross reference between part number, NIIN, & NSN.

FEDLOG

- Gives you the logistics, ordering, disposal, & characteristics of a part.
- Gives you the ability to cross reference between part number, NIIN, & NSN.
- Lets you search by item name.

Check on Learning

Q: How can we search for a part on Fedlog?

Check on Learning

Q: How can we search for a part on Fedlog?

A: NSN, NIIN, Part Number, & nomenclature (Slides 25-27).

Check on Learning

Q: Why is the NIIN important?

Check on Learning

Q: Why is the NIIN important?

A: Technical manuals, parts manuals, & supply catalogs are listed in NIIN sequence (Slide 9).

Check on Learning

Q: What are two ways to look up various codes and their meaning on the AMDF print?

Check on Learning

Q: What are two ways to look up various codes and their meaning on the AMDF print?

A: The Fedlog Help Key and the DLA Handbook (Slide 32 & 33).

Enabling Learning

Objective B

Task: Describe characteristics of Class 9 repair parts.

Condition: In a classroom environment.

Standard: IAW applicable references.

Class 9 Repair Parts

- **So now that you know how to get an AMDF print from an NSN, NIIN, & part number what do you do next?**

Class 9 Repair Parts

- So now that you know how to get an AMDF print from an NSN, NIIN, & part number what do you do next?
- **First you make sure it's a class 9 part.**

Class 9 Repair Parts

- So now that you know how to get an AMDF print from an NSN, NIIN, & part number what do you do next?
- First you make sure it's a class 9 part.
- Take a look at the AMDF print on the next slide to see how this is done.

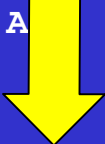

Look Here For Class of Supply

Unit of Issue

- Now if a mechanic needs 5 of these bolts listed on the last slide, how many are ordered under that NSN?

Unit of Issue

- Now if a mechanic needs 5 of these bolts listed on the last slide, how many are ordered under that NSN?
- **The answer is one.**

Unit of Issue

- Now if a mechanic needs 5 of these bolts listed on the last slide, how many are ordered under that NSN?
- The answer is one. **Why?**

Unit of Issue

- Now if a mechanic needs 5 of these bolts listed on the last slide, how many are ordered under that NSN?
- The answer is one. Why?
- Because under that NSN an order of one will get you one package with 20 bolts in it.

Unit of Issue

- If you had said 5 you would have received 5 packages for a total of 100 bolts.

Unit of Issue

- If you had said 5 you would have received 5 packages for a total of 100 bolts.
- What if the UI had been HD for Hundred or TH for thousand?

Unit of Issue

- If you had said 5 you would have received 5 packages for a total of 100 bolts.
- What if the UI had been HD for Hundred or TH for thousand?
- **Suppose the measured quantity for the package was 1000....**

Unit of Issue

- That same order of 5 would have netted you 5000 bolts!!!

Unit of Issue

- That same order of 5 would have netted you 5000 bolts!!!
- This is why checking the UI is so critical.

Unit of Issue

- That same order of 5 would have netted you 5000 bolts!!!
- This is why checking the UI is so critical.
- 5000 bolts is embarrassing enough, but just think if it was a high dollar item...

Recoverability Code

- Recoverability Code (RC) lets us know if we have to turn in the old part upon receipt of the new part and to whom.

Recoverability Code

- Recoverability Code (RC) lets us know if we have to turn in the old part upon receipt of the new part and to whom.
- This is usually done for parts that can be repaired such as generators and starters, or hazmat items such as batteries.

Recoverability Code

- Recoverability Code (RC) lets us know if we have to turn in the old part upon receipt of the new part and to whom.
- This is usually done for parts that can be repaired such as generators and starters, or hazmat items such as batteries.
- **The unit usually has 10 days to turn the part in.**

Recoverability Code

- The Supply Support Activity (SSA) will track recoverable parts owed.

Recoverability Code

- The Supply Support Activity (SSA) will track recoverable parts owed.
- This list is briefed to the unit and chain of command.

Recoverability Code

- The Supply Support Activity (SSA) will track recoverable parts owed.
- This list is briefed to the unit and chain of command.
- See the Fedlog Help Key or DLA Handbook for RC codes.

AMDF codes on Fedlog?**

**A: Fedlog Help Key & DLA Handbook
(Slide 58, 72, & 103).**

Check on Learning

Q: What are 2 ways to look up the AMDF codes on Fedlog?

A: Fedlog Help Key & DLA Handbook.

Q: Which codes tells us how to order an item and under what restrictions?

Check on Learning

Q: What are 2 ways to look up the AMDF codes on Fedlog?

A: Fedlog Help Key & DLA Handbook.

Q: Which codes tells us how to order an item and under what restrictions?

**A: Acquisition Advice Code (AAC)
(Slide 57).**

Enabling Learning Objective C

Task: Describe the characteristics of class 2, 4, & 7 parts.

Condition: In a classroom environment.

Standard: IAW applicable references.

S4 and Supply

- **Class 2, 4, & 7 items are ordered by a unit's S4 section or the unit supply section.**

Many Similarities

- The same rules you've learned with ordering class 9 parts also apply to class 2, 4, & 7 items.

Many Similarities

- The same rules you've learned with ordering class 9 parts also apply to class 2, 4, & 7 items.
- The differences are the codes we look at on the AMDF print.

Many Similarities

- The same rules you've learned with ordering class 9 parts also apply to class 2, 4, & 7 items.
- The differences are the codes we look at on the AMDF print.
- **Let's take a look at a class 2 item and see.**

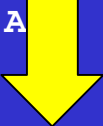

Typical Class 2 Item

Army Master Data File Response for NSN 5140-00-315-2747

Item Name: TOOL BOX,PORTABLE

Effective Date: 1 Apr 2000

Nomenclature: TOOL BOX,PORTABLE

Typical Class 2 Item

- Note that we use the same AMDF print.

Typical Class 2 Item

- Note that we use the same AMDF print.
- We still look at SCMC, price, AAC, unit of issue, etc.

Typical Class 2 Item

- Note that we use the same AMDF print.
- We still look at SCMC, price, AAC , unit of issue, etc.
- The big difference is the Accounting Requirements Code (ARC).

ARC Code

- Three ARC codes: X, N, & D.

ARC Code

- Three ARC codes: X, N, & D.
- The ARC code tells you if an item is property book (hand receipt) accountable.

ARC Code

- Three ARC codes: X, N, & D.
- The ARC code tells you if an item is property book (hand receipt) accountable.
- **Property book items have an ARC code of N and require hand receipts.**

ARC Code

- Three arc codes: X, N, & D.
- The ARC code tells you if an item is property book (hand receipt) accountable.
- Property book items have an ARC code of N and require hand receipts.
- **Notice that all Class 7 items are ARC N.**

ARC Code

- Expendable items have an ARC code of X.

ARC Code

- Expendable items have an ARC code of X.
- These items do not require property book accountability.

ARC Code

- Expendable items have an ARC code of X.
- These items do not require property book accountability.
- **Notice that all class 9 parts are ARC X.**

ARC Code

- Durable items have an ARC code of D.

ARC Code

- Durable items have an ARC code of D.
- While ARC D items are not property book accountable, they will nevertheless be hand receipted to the end user to ensure accountability.

ARC Code

- Durable items have an ARC code of D.
- While ARC D items are not property book accountable, they will nevertheless be hand receipted to the end user to ensure accountability.
- The next slide is a good example.

ARC Code

Check on Learning

Q: What code are we concerned with when it comes to class 2, 4, & 7 items?

Check on Learning

Q: What code are we concerned with when it comes to class 2, 4, & 7 items?

A: The Accounting Requirements Code (ARC) (Slide 128).

Check on Learning

Q: Which ARC code is a property book item and requires hand receipts?

Check on Learning

Q: Which ARC code is a property book item and requires hand receipts?

A: ARC N (Slide 131).

Check on Learning

Q: Which ARC code is a property book item and requires hand receipts?

A: ARC N.

Q: Expendable items have which ARC code?

Check on Learning

Q: Which ARC code is a property book item and requires hand receipts?

A: ARC N.

Q: Expendable items have which ARC code?

A: X (Slide 133).

Enabling Learning Objective D

Task: Describe the characteristics of how an item is ordered.

Condition: In a classroom environment.

Standard: IAW applicable references.

Order It

- So now that we can research a part on Fedlog, lets see how to order it.

Order It

- So now that we can research a part on Fedlog, lets see how to order it.
- To do this we'll need a document number.

Order It

- So now that we can research a part on Fedlog, lets see how to order it.
- To do this we'll need a document number.
- **Lets look at one and see how it works.**

Typical Document Number

- **W45U7Z 0304 1001** is a typical document number.

Typical Document Number

- W45U7Z 0304 1001 is a typical document number.
- The document number is made of three parts.

Typical Document Number

- W45U7Z 0304 1001 is a typical document number.
- The document number is made of three parts.
- **DODAAC, Julian date, & sequence number.**

Typical Document Number

- W45U7Z is the DODAAC or Department of Defense Address Activity Code.

Typical Document Number

- W45U7Z is the DODAAC or Department of Defense Address Activity Code.
- This identifies the unit ordering the part.

Typical Document Number

- W45U7Z is the DODAAC or Department of Defense Address Activity Code.
- This identifies the unit ordering the part.
- Ordering expenditures and budgets are tracked by DODAAC.

Typical Document Number

- 0304 is the Julian date.

Typical Document Number

- 0304 is the Julian date.
- The first number is the last number of the year i.e. 2000, 1990, 1980, etc.

Typical Document Number

- 0304 is the Julian date.
- The first number is the last number of the year i.e. 2000, 1990, 1980, etc.
- The next 3 numbers are the day of the year.

Typical Document Number

- 0304 is the Julian date.
- The first number is the last number of the year i.e. 2000, 1990, 1980, etc.
- The next 3 numbers are the day of the year.
- 304 would be the 304th day of the year or Oct 30 since it was a leap year.

Typical Document Number

- Julian date calendars are found in the Maintenance Update, Supply Update, & DLA Handbook.

Typical Document Number

- Julian date calendars are found in the Maintenance Update, Supply Update, & DLA Handbook.
- **Note that there is a separate Julian date calendar to accommodate leap years.**

Typical Document Number

- 1001 is the sequence number.

Typical Document Number

- 1001 is the sequence number.
- The sequence number is generated and administered by the requesting unit.

Typical Document Number

- 1001 is the sequence number.
- The sequence number is generated and administered by the requesting unit.
- Usually the Commander or Local SOP will dictate which sequence numbers to use.

Typical Document Number

	JULIAN	SEQUENCE
DODAAC	DATE	NUMBER
W45U7Z	0304	1001

Priorities

- Once we have a document number it must have a priority.

Priorities

- Once we have a document number it must have a priority.
- The unit's Force Activity Designator (FAD) determines its priorities.

Priorities

- Once we have a document number it must have a priority.
- The unit's Force Activity Designator (FAD) determines its priorities.
- **MTOE units are usually FAD 2 and have 02, 05, &12 priorities.**

Priorities

- Once we have a document number it must have a priority.
- The unit's Force Activity Designator (FAD) determines its priorities.
- MTOE units are usually FAD 2 and have 02, 05, & 12 priorities.
- TDA units are usually FAD 3 and have 03, 06, & 13 priorities.

Priorities

- 12 and 13 are for routine orders and take the longest time.

Priorities

- 12 and 13 are for routine orders and take the longest time.
- 02, 03, & 05, 06 are considered high priority orders.

Priorities

- 12 and 13 are for routine orders and take the longest time.
- 02, 03, & 05, 06 are considered high priority orders.
- 02 & 03 for parts that make an item non-mission capable (NMC).

Priorities

- 12 and 13 are for routine orders and take the longest time.
- 02, 03, & 05, 06 are considered high priority orders.
- 02 & 03 for parts that make an item non-mission capable (NMC).
- **05 & 06 for anticipated NMC parts.**

Priorities

- So as you can see, the lower the number the higher the priority and hence a faster shipping time.

Priorities

- So as you can see, the lower the number the higher the priority and hence a faster shipping time.
- To protect against abuse orders are put on a Commander's Exception Report.

Commander's Exception Report

- Acts as a safe guard for abuse.

Commander's Exception Report

- Acts as a safe guard for abuse.
- Requires the CDR to initial and sign for high priority (08 & higher) parts.

Commander's Exception Report

- Acts as a safe guard for abuse.
- Requires the CDR to initial and sign for high priority (08 & higher) parts.
- Requires the CDR to initial & sign for high dollar parts (typically \$500 or more).

Commander's Exception Report

- Acts as a safe guard for abuse.
- Requires the CDR to initial and sign for high priority (08 & higher) parts.
- Requires the CDR to initial & sign for high dollar parts (typically \$500).
- Provides a total amount spent on a given day.

Order It

- So now that we've researched our part on Fedlog, know what a document number is, had the CDR sign off on the exception report, lets order it.

Unit Level Logistics System

- Class 9 repair parts are typically ordered on the Unit Level Logistics System (ULLS) computer.

Unit Level Logistics System

- Class 9 repair parts are typically ordered on the Unit Level Logistics System (ULLS) computer.
- **ULLS-G for Ground or Motorpools.**

Unit Level Logistics System

- Class 9 repair parts are typically ordered on the Unit Level Logistics System (ULLS) computer.
- ULLS-G for Ground or Motorpools.
- ULLS-A for Aircraft.

Unit Level Logistics System

- Class 9 repair parts are typically ordered on the Unit Level Logistics System (ULLS) computer.
- ULLS-G for Ground or Motorpools.
- ULLS-A for Aircraft.
- Class 2 & 4 on ULLS-S4 for S4 & Supply.

Unit Level Logistics System

Exception to the Rule

- **Class 7 items are ordered on a DD Form 2765-1 through PBO.**

Unit Level Logistics System

Exception to the Rule

- Class 7 items are ordered on a DD Form 2765-1 through PBO.
- Also note that in some TDA units such as USAOC&S, nonexpendable items get a document number from the PBO.

Unit Level Logistics System

- When the day's requisitions are ready ULLS will generate a print of all items ordered that day.

Unit Level Logistics System

- When the day's requisitions are ready ULLS will generate a print of all items ordered that day.
- The ULLS computer will generate the CDR's exception report.

Unit Level Logistics System

- When the day's requisitions are ready ULLS will generate a print of all items ordered that day.
- The ULLS computer will generate the CDR's exception report.
- Now the orders are ready to go to the Supply Support Activity (SSA).

Unit Level Logistics System

- The orders are transmitted to the SSA via diskette or modem.

Unit Level Logistics System

- The orders are transmitted to the SSA via diskette or modem.
- ULLS will print a receipt for the SSA clerk to sign upon receipt of your requisitions.

Unit Level Logistics System

- The orders are transmitted to the SSA via diskette or modem.
- ULLS will print a receipt for the SSA clerk to sign upon receipt of your requisitions.
- The requisitions are input into the Standard Army Retail Supply System computer (SARSS).

SARSS Response

- The SARSS computer will check the inventory at the SSA.

SARSS Response

- The SARSS computer will check the inventory at the SSA.
- SARSS will also issue a status code on your document number.

SARSS Response

- The SARSS computer will check the inventory at the SSA.
- SARSS will also issue a status code on your document number.
- If the part is on-hand a Material Release Order (MRO) is cut and the part is issued to the requesting unit.

SARSS Response

- **SARSS will send the status code to the requesting unit's ULLS computer via diskette or modem.**

SARSS Response

- SARSS will send the status code to the requesting unit's ULLS computer via diskette or modem.
- If you do not have a status code within 72 hours you need to find out why.

SARSS Response

- SARSS will send the status code to the requesting unit's ULLS computer via diskette or modem.
- If you do not have a status code within 72 hours you need to find out why.
- **Make sure the document number is in your ULLS box first, then check the SARSS box at the SSA.**

Transaction Status Codes

- Status Codes tells you what the disposition is with your document number (and hence, your part).

Transaction Status Codes

- Status Codes tell you what the disposition is with your document number (and hence, your part).
- Status Codes are found in the DLA Handbook and in AR 725-50.

Check on Learning

Q: What safe guard is used when ordering high priority or high dollar parts?

Check on Learning

Q: What safe guard is used when ordering high priority or high dollar parts?

A: The Commander's Exception Report (Slide 188 & 189).

Check on Learning

Q: How soon should you receive a status on your requisition from SARSS?

Check on Learning

Q: How soon should you receive a status on your requisition from SARSS?

A: 72 hours (Slide 210).

Enabling Learning Objective

E

Task: Describe the characteristics of how an item is tracked until receipt.

Condition: In a classroom environment.

Standard: IAW applicable references.

Requisition Route

- So now that we know a little about ordering a part lets see what route your document takes to get your part to you.

Requisition Route

- So now that we know a little about ordering a part lets see what route your document takes to get your part to you.
- We already know that the part is ordered on ULLS and transmitted to SARSS at the SSA.

Requisition Route

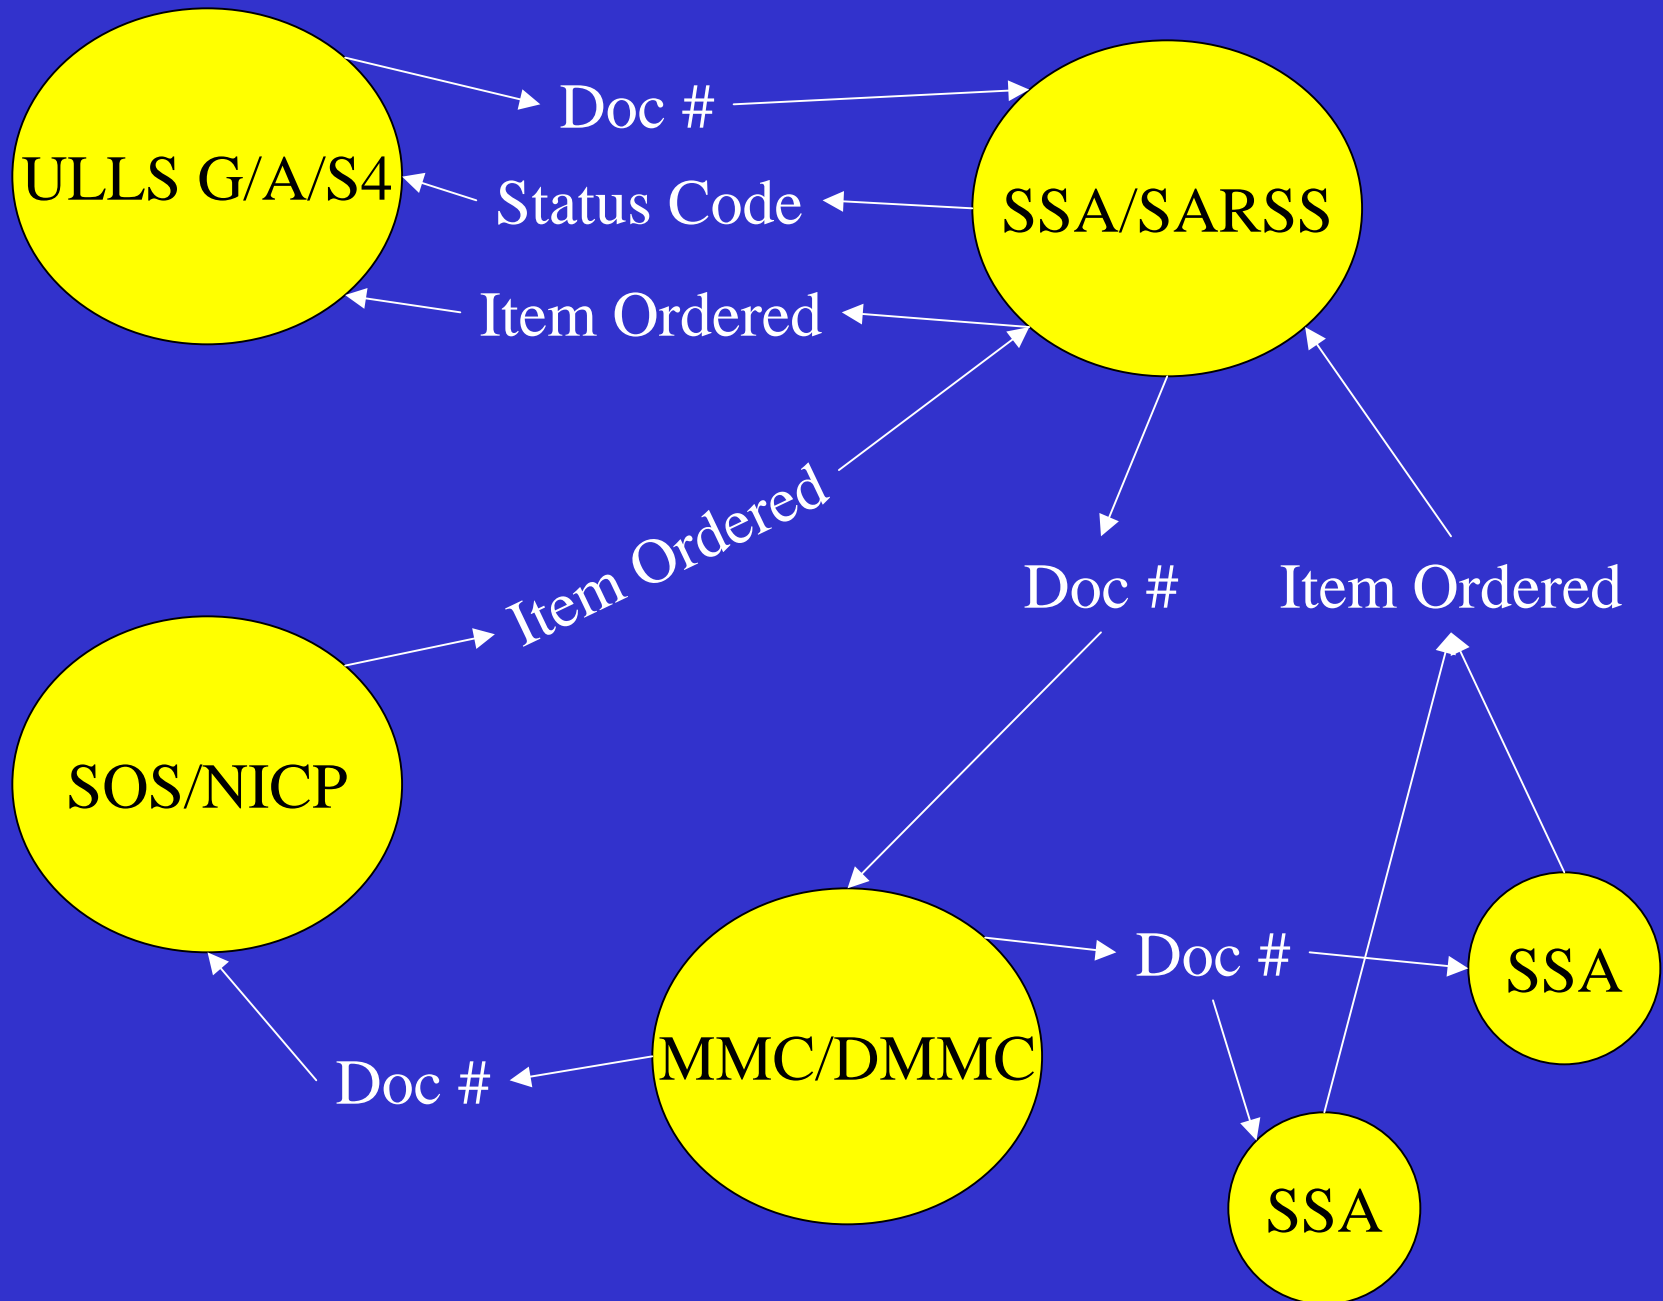

- From there the document number can go to several different locations.

Requisition Route

- From there the document number can go to several different locations.
- It may look confusing at first, but is really quite simple.

Requisition Route

- From there the document number can go to several different locations.
- It may look confusing at first, but is really quite simple.
- You may want to print the next slide to make it easier to follow along.

Requisition Route

- The Document number is generated by the ULLS-G/A/S4 box and is transmitted to the SSA SARSS box via diskette or modem.

Requisition Route

- The Document number is generated by the ULLS-G/A/S4 box and is transmitted to the SSA SARSS box via diskette or modem.
- The SSA SARSS box should transmit a status code back to your ULLS box via diskette or modem within 72 hrs.

Requisition Route

- Once the SARSS box has your document number it will search the SSA inventory to see if the part is on hand.

Requisition Route

- Once the SARSS box has your document number it will search the SSA inventory to see if the part is on hand.
- If the part is on hand SARSS will cut a Material Release Order (MRO) and you can pickup your part at the SSA.

Requisition Route

- If the part is not on hand, SARSS will create its own document number (called a rollup document number).

Requisition Route

- If the part is not on hand, SARSS will create its own document number (called a rollup document number).
- The roll up doc # is passed along to the Material Management Center or Division Material Management Center depending on how you are organized.

Requisition Route

- The Material Management Center (MMC) will check all of its subordinate SSAs for your item.

Requisition Route

- The Material Management Center (MMC) will check all of its subordinate SSAs for your item.
- If one of the subordinate SSAs has the part, MMC will direct them to ship it to your SSA.

Requisition Route

- If the MMC cannot locate the part the rollup doc # is passed to the National Item Control Point (NICP) or Source of Supply (SOS).

Requisition Route

- If the MMC cannot locate the part the rollup doc # is passed to the National Item Control Point (NICP) or Source of Supply (SOS).
- Usually these two entities are one in the same.

Requisition Route

- **SOS/NICP will check its inventory and ship the item to your SSA.**

Requisition Route

- SOS/NICP will check its inventory and ship the item to your SSA.
- If SOS/NICP doesn't have the part on hand, you may be in for a waiting period.

A Few Notes to Ponder

- **Notice that the item is ALWAYS shipped to your SSA.**

A Few Notes to Ponder

- Notice that the item is ALWAYS shipped to your SSA.
- Also notice that the Status Code on your doc # comes from the SSA.

A Few Notes to Ponder

- Notice that the item is **ALWAYS** shipped to your SSA.
- Also notice that the Status Code on your doc # comes from the SSA.
- What if it is a high priority (02 or 03) item? How do you get a status code on the roll up doc #?

A Few Notes to Ponder

- **First of all you must get the rollup document number from the SSA.**

A Few Notes to Ponder

- First of all you must get the rollup document number from the SSA.
- They'll do this for high priority document numbers, but not every document number.

A Few Notes to Ponder

- First of all you must get the rollup document number from the SSA.
- They'll do this for high priority document numbers, but not every document number.
- Then you run what is called a LIF.

Logistics Intelligence File

- A LIF is an acronym for Logistics Intelligence File.

Logistics Intelligence File

- A LIF is an acronym for Logistics Intelligence File.
- LIF will give you the status code of the roll up doc # no matter where in the world it is.

Logistics Intelligence File

- A LIF is an acronym for Logistics Intelligence File.
- LIF will give you the status code of the roll up doc # no matter where in the world it is.
- Do not run LIF on your ULLS doc # as it doesn't get passed along.

Logistics Intelligence File

- There are several ways to run LIF.

Logistics Intelligence File

- There are several way to run LIF.
- The easiest way is through the Defense Logistics Agency (DLA).

Logistics Intelligence File

- There are several way to run LIF.
- The easiest way is through the Defense Logistics Agency (DLA).
- They are located at [HTTP://WWW.DLA.MIL](http://www.dla.mil)

Logistics Intelligence File

- There are several way to run LIF.
- The easiest way is through the Defense Logistics Agency (DLA).
- They are located at [HTTP://WWW.DLA.MIL](http://www.dla.mil)
- LIF can also be accessed through LINK which is part of your FEDLOG. You'll need to apply for a password.

Logistics Intelligence File

- Remember that when you run LIF the roll up document number is the SSAs DODAAC & document number.

Logistics Intelligence File

- Remember that when you run LIF the roll up document number is the SSAs DODAAC & document number.
- LIF will also give you a Routing Identification Code (RIC) to let you know where the status code is coming from.

Logistics Intelligence File

- Every SSA, MMC/DMMC, and SOS/NICP has a RIC code.

Logistics Intelligence File

- Every SSA, MMC/DMMC, and SOS/NICP has a RIC code.
- Ask your SSA and MMC what theirs is.

Logistics Intelligence File

- Every SSA, MMC/DMMC, and SOS/NICP has a RIC code.
- Ask your SSA and MMC what theirs is.
- **SOS/NICP can be found in the DLA Handbook.**

Logistics Intelligence File

- SOS/NICP RIC codes can also be found on Fedlog.

Logistics Intelligence File

- SOS/NICP RIC codes can also be found on Fedlog.
- Use the Help Key to see what the RIC code represents.

Logistics Intelligence File

- SOS/NICP RIC codes can also be found on Fedlog.
- Use the Help Key to see what the RIC code represents.
- See the next slide for an example.

Logistics Intelligence File

Army Master Data File Response for NSN 2920-00-909-2483

Check on Learning

Q: What does every SSA, MMC, & SOS/NICP have to identify it?

Check on Learning

Q: What does every SSA, MMC, & SOS/NICP have to identify it?

**A: Routing Identification Code (RIC)
(Slide 252).**

Check on Learning

Q: No matter where the part comes from, where is it shipped to?

Check on Learning

Q: No matter where the part comes from, where is it shipped to?

A: Your SSA (Slide 237).

Check on Learning

Q: When running a LIF, which document number do you use?

Check on Learning

Q: When running a LIF, which document number do you use?

A: The rollup document number generated by SARSS (Slide 240).

Terminal Learning Objective

Task: Describe the necessary actions and documentation to maintain a hand- receipt.

Condition: In a classroom Environment.

Standard: IAW applicable references.

Enabling Learning Objective

A

Task: Describe the necessary actions and documentation to maintain a hand-receipt.

Condition: In classroom environment.

Standard: IAW applicable references.

Hand Receipt Holders

- Whether you are signed for a toolbox or a major hand receipt worth millions of dollars the rules are essentially the same.

Hand Receipt Holders

- Whether you are signed for a toolbox or a major hand receipt worth millions of dollars the rules are essentially the same.
- The main regulation for hand receipts is AR 710-2.

Hand Receipts

- Typical hand receipts list the name of the item, the NSN, and the LIN.

Hand Receipts

- Typical hand receipts list the name of the item, the NSN, and the LIN.
- **LIN is an acronym for Line Item Number.**

Line Item Number

- Typical hand receipts list the name of the item, the NSN, and the LIN.
- LIN is an acronym for Line Identification Number.
- **The LIN can be found on Fedlog (or the AMDF print) and cross-referenced between NSN & part number.**

Line Item Number

- The next slide shows a LIN on AMDF.

Line Item Number (LIN)

Army Master Data File Response for NSN 1095-01-211-7962

Hand Receipts

- The next slide shows a LIN on AMDF.
- Notice that the ARC is N when you deal with major hand receipts.

Hand Receipts

- The next slide shows a LIN on AMDF.
- Notice that the ARC is N when we deal with major hand receipts.
- Remember that all class 7 items have an ARC of N.

Hand Receipts

- The next slide shows a LIN on AMDF.
- Notice that the ARC is N when we deal with major hand receipts.
- Remember that all class 7 items have an ARC of N.
- All class 7 items will also have a LIN.

Inventory, Inventory, Inventory

- **The first thing you do when you get a new hand receipt is inventory.**

Inventory, Inventory, Inventory

- The first thing you do when you get a new hand receipt is inventory.
- You MUST personally verify that all items are on hand.

Inventory, Inventory, Inventory

- The first thing you do when you get a new hand receipt is inventory.
- You MUST personally verify that all items are on hand.
- If you don't see, don't sign for it.

Inventory, Inventory, Inventory

- The first thing you do when you get a new hand receipt is inventory.
- You MUST personally verify that all items are on hand.
- If you don't see, don't sign for it.
- If you're not sure if all of the items are present get a supply catalog (SC).

Supply Catalog

- The supply catalog (SC) lists all of the sub-components of an end item.

Supply Catalog

- The supply catalog (SC) lists all of the sub-components of an end item.
- Typically, SCs are used to list the components of sets, kits, and outfits (SKO).

Supply Catalog

- To find out which SC you need you look it up on DA PAM 25-30, Consolidated Index of Army Publications & Blank Forms.

Supply Catalog

- To find out which SC you need, you look it up on DA PAM 25-30, Consolidated Index of Army Publications & Blank Forms.
- The SC can be cross-referenced by LIN, NSN, & NIIN.

Supply Catalog

- Now that you know what SC to look for where do you find it?

Supply Catalog

- Now that you know what SC to look for where do you find it?
- Most SCs are located on CD-ROM (EM0074), in the MOS Library, or online at WWW.LOGSA.ARMY.MIL where you'll need a password to access it.

BII & AII

- **Basic Issue Items (BII) and Additional Issue Items are typically found with vehicles, generators, etc.**

BII & AII

- **Basic Issue Items (BII) and Additional Issue Items are typically found with vehicles, generators, etc.**
- **Jacks, tire irons, warning triangles, & grounding equipment are typical BII items.**

BII & AII

- **BII and AII are found in the 10 level technical manuals.**

BII & All

- BII and All are found in the 10 level technical manuals.
- BII and All are also found in the 10 level hand receipt (-10HR).

Hand Receipt Inventories

- Now that you have your SC and –10 manuals you are ready to inventory.

Hand Receipt Inventories

- Now that you have your SC and –10 manuals you are ready to inventory.
- Hand receipts that come from property book office (PBO) are usually on a computer printout.

Hand Receipt Inventories

- Now that you have your SC and –10 manuals you are ready to inventory.
- Hand receipts that come from property book office (PBO) are usually on a computer printout.
- Hand receipts from a primary hand receipt holder are usually on DA 2062 or a copy of a SC.

As You Inventory...

- **Make sure you visually account for each item.**

As You Inventory...

- Make sure you visually account for each item.
- Have 2 copies of each SC, BII list, and even the hand receipt itself.

As You Inventory...

- Make sure you visually account for each item.
- Have 2 copies of each SC, BII list, and even the hand receipt itself.
- **WHY?**

As You Inventory...

- Make sure you visually account for each item.
- Have 2 copies of each SC, BII list, and even the hand receipt itself.
- **WHY?** Because you list on-hand quantities on one and shortages on the other.

Shortage Annex

- It is as *critical* to list your shortages as it is your on-hand quantities!

Shortage Annex

- It is as *critical* to list your shortages as it is your on-hand quantities!
- Your list of shortages is called a shortage annex.

Shortage Annex

- It is as *critical* to list your shortages as it is your on-hand quantities!
- Your list of shortages is called a shortage annex.
- It is official acknowledgement from PBO or the primary hand receipt holder that those items are missing.

Shortage Annex

- A shortage annex must be annotated as such on each SC, DA2062, etc.

Shortage Annex

- A shortage annex must be annotated as such on each SC, DA2062, etc.
- **Make sure the PBO or primary hand receipt holder signs off on the shortage annex.**

Shortage Annex

- A shortage annex must be annotated as such on each SC, DA2062, etc.
- Make sure the PBO or primary hand receipt holder signs off on the shortage annex.
- This is as critical as you signing the hand receipt!

Changes to the Hand Receipt

- Needed changes to the hand receipt because of typos, MTOE/TDA deletions, substitutes, etc. are done by way of change documents.

Changes to the Hand Receipt

- Needed changes to the hand receipt because of typos, MTOE/TDA deletions, substitutes, etc. are done by way of change documents.
- **Changes must be made to the hand receipt before it is initially signed.**

Sign The Hand Receipt

- Make sure the inventory and shortage annex is to your satisfaction.

Sign The Hand Receipt

- Make sure the inventory and shortage annex is to your satisfaction.
- Don't be bullied into signing and don't buy into fix-it promises after you've signed.

Sign The Hand Receipt

- Make sure the inventory and shortage annex is to your satisfaction.
- Don't be bullied into signing and don't buy into fix it promises after you've signed.
- Once you've signed YOU are responsible.

Sign The Hand Receipt

- **When you are ready to sign, make sure that there are two copies of the hand receipt and the shortage annex.**

Sign The Hand Receipt

- When you are ready to sign, make sure that there are two copies of the hand receipt and the shortage annex.
- One copy for you and the other for PBO/Major hand receipt holder.

Sign The Hand Receipt

- When you are ready to sign, make sure that there are two copies of the hand receipt and the shortage annex.
- One copy for you and the other for PBO/Major hand receipt holder.
- **This is your base document for future hand receipts or sub hand receipts to subordinates.**

You're Not Done Yet

- **Now that you have signed the hand receipt you need to do a partial inventory every month.**

You're Not Done Yet

- Now that you have signed the hand receipt you need to do a partial inventory every month.
- By regulation it must be at least 10%.

You're Not Done Yet

- Now that you have signed the hand receipt you need to do a partial inventory every month.
- By regulation it must be at least 10%.
- This is what CDRs refer to as their 10% inventory.

You're Not Done Yet

- Now that you have signed the hand receipt you need to do a partial inventory every month.
- By regulation it must be at least 10%.
- This is what CDRs refer to as their 10% inventory.
- You can do more if your hand receipt is small or you have time.

You're Not Done Yet

- **You usually do not have to do a 10% if you are a sub hand receipt holder.**

You're Not Done Yet

- You usually do not have to do a 10% if you are a sub hand receipt holder.
- But you do have to do an inventory at least annually.

A Point to Ponder

- **It cannot be stressed enough the importance of getting your inventories and shortages straight as soon as possible.**

A Point to Ponder

- It cannot be stressed enough the importance of getting your inventories and shortages straight as soon as possible.
- This is especially true if you have items that are Unit Status Report (USR) or Material Status Report (MSR) reportable on your hand receipt.

A Point to Ponder

- **The leg work you do in the beginning will make last minute requests for hand receipt information, and hand receipt changes that much easier.**

Check on Learning

Q: When you sign for your hand receipt what document needs to be signed off on as well?

Check on Learning

Q: When you sign for your hand receipt what document needs to be signed off on as well?

A: The Shortage Annex (Slide 302).

Check on Learning

Q: Where can you find out which Supply Catalog you need if you know the LIN, NSN, NIIN, or part number?

Check on Learning

Q: Where can you find out which Supply Catalog you need if you know the LIN, NSN, NIIN, or part number?

A: DA PAM 25-30 (Slide 283).

Check on Learning

Q: If you are signing for a CUCV pickup truck where would you find the BII list?

Check on Learning

Q: If you are signing for a CUCV pick-up truck where would you find the BII list?

A: In the –10 or –10HR manual (Slide 289 & 290).

Check on Learning

**Q: If that same CUCV didn't have BII
how would you annotate it?**

Check on Learning

Q: If that same CUCV didn't have BII how would you annotate it?

A: On the Shortage Annex (Slide 279 - 299).

End of Presentation

This ends the presentation. Keep in mind that there is no substitute for experience. The presentation is designed to give you the basics, apply them, and ask lots of questions. Keep in mind that the smart Warrant Officer or NCO didn't get that way overnight 😊
